

Request Number: 2026-ICFO-25291
Submission Date: 4/27/2026
Agency: Department of Homeland Security
Component: US Immigrations & Customs Enforcement
Processing Track: Simple
Status: Awaiting Agency Review
Request Description:

1. All records identifying locations currently or formerly used for Intensive Supervision Appearance Program (ISAP) check-ins, including but not limited to addresses, office names, and operating schedules — whether operated directly by ICE or by any third party, contractor, subcontractor, or vendor acting on ICE's behalf.
2. All contracts, task orders, statements of work, and lease or sublease agreements related to ISAP check-in facilities, including any agreements held in the name of any third party, contractor, subcontractor, or vendor — regardless of whether the agreement is nominally in ICE's name.
3. Any records identifying the party responsible for each ISAP check-in location, including records distinguishing ICE-operated locations from those operated by or through any third party. Timeframe: Facilities active as of January 1, 2026 to the date this request is processed. Scope clarification: This request encompasses records held by ICE Enforcement and Removal Operations (ERO), the Office of Acquisition Management, and any other ICE component with responsive records. Records reflecting ISAP check-in locations operated, leased, or maintained by or through any third party — including locations not held in ICE's name — are expressly included within scope.

Fee Waiver Status: Pending Decision

Fee Waiver Justification:

I request a full fee waiver pursuant to 5 U.S.C. § 552(a)(4)(A)(iii) and 6 C.F.R. § 5.11(k). Disclosure of the requested records is in the public interest because it is likely to contribute significantly to public understanding of government operations and is not primarily in my commercial interest.

Factor 1 — Subject matter is of public interest The subject of this request — the locations at which ICE conducts ISAP check-ins, including those operated through third-party contractors — concerns the exercise of federal immigration enforcement authority over individuals in the

community. The geographic footprint of ISAP check-in infrastructure, and the extent to which it is administered through private contractors operating outside public view, is a matter of significant and current public concern, particularly in light of the substantial expansion of DHS enforcement capacity contemplated by pending federal legislation.

Factor 2 — Disclosure will contribute to public understanding The requester, Project Salt Box, is an independent, not-for-profit data journalism organization whose mission is to document and analyze the scope of DHS expansion through public records. Project Salt Box publishes its findings in formats accessible to the general public and is committed to making government data available in structured, searchable form. The requested records are not otherwise publicly available; ISAP check-in locations operated through contractors are not disclosed in any public-facing government database or contracting record. Disclosure will directly inform public understanding of how and where federal immigration supervision is being carried out.

Factor 3 — Contribution will be significant The public currently has no comprehensive accounting of where ISAP check-ins occur or the degree to which those locations are operated by private contractors rather than ICE directly. This informational gap is not incidental. Contractor-operated facilities may be leased and staffed entirely in the contractor's name, rendering them invisible to standard oversight mechanisms. Disclosure of a complete, authoritative list of check-in locations would represent a meaningful and non-duplicative addition to public knowledge about the administration of a federal program that directly affects the liberty interests of hundreds of thousands of individuals.

Factor 4 — Request is not primarily commercial Project Salt Box is a not-for-profit organization. The requester has no commercial interest in the requested records and will derive no financial benefit from their disclosure. The records will be used solely for journalism and public education purposes. Any request processing fees would represent a direct burden on a not-for-profit public interest operation, without any corresponding public benefit from fee collection.

Expedited Processing Status: Pending Decision

Expedited Processing Justification:

Expedited processing request 5 U.S.C. § 552(a)(6)(E) · 6 C.F.R. § 5.5(e)(1)(ii) I request expedited processing pursuant to 5 U.S.C. § 552(a)(6)(E) and 6 C.F.R. § 5.5(e)(1)(ii), which provides for expedition where there is an "urgency to inform the public about actual or alleged federal government activity" and the request is made by a person primarily engaged in disseminating information to the public.

Urgency to inform the public

Congress is actively considering reconciliation action that could substantially expand DHS immigration enforcement authority and funding, including programs that rely on ISAP infrastructure. Public and legislative debate about the scope, cost, and contractor-dependence of that infrastructure is occurring now. Responsive records go directly to questions that are live in that debate — specifically, how extensively ICE has already delegated ISAP check-in operations to private contractors, and at what locations. Information that arrives after legislation is enacted will be significantly less useful to public understanding of the choices being made.

Primarily engaged in public dissemination

Project Salt Box is an independent, not-for-profit data journalism organization primarily engaged in gathering and disseminating information to the public about federal immigration enforcement. It is not a commercial entity. Its work is directed at public audiences and published in accessible formats. This satisfies the regulatory requirement that expedited processing requesters be "primarily engaged in disseminating information." See 6 C.F.R. § 5.5(e)(1)(ii). Certification Pursuant to 5 U.S.C. § 552(a)(6)(E)(vi), I certify that the foregoing statements regarding the need for expedited processing are true and correct to the best of my knowledge and belief.
